Education

Polytechnic University of the Philippines

Sta. Mesa, Maynila

Bachelor of Science in Computer Science

2021 – 2025

- **Grades:** GPA: 1.35 – **Cum Laude**

Experience

DevOps Engineer Trainee

Nov 2025 – Present

Hitachi Digital Payment Solutions Inc,

Ayala Ave, Makati City

- Supported the design, maintenance, and optimization of CI/CD pipelines in Azure DevOps, enabling reliable deployment workflows for backend services, mobile applications, and enterprise payment solutions.
- Implemented DevSecOps practices by integrating SonarQube, Trivy, TruffleHog, and OWASP Dependency Check into build pipelines to improve code quality, vulnerability detection, and compliance.
- Developed automated email notification processes within CI pipelines, improving deployment visibility and communication between development and operations teams.
- Administered and maintained containerized applications on Kubernetes, managing deployments, configuration changes, environment provisioning, scaling activities, and release automation across development, UAT, and disaster recovery environments.
- Troubleshoot deployment, application, networking, ingress, storage, and environment synchronization issues involving Azure DevOps, ArgoCD, Kubernetes, and supporting infrastructure, ensuring reliable application delivery and platform stability.
- Participated in Disaster Recovery (DR) exercises, validating application recoverability, environment readiness, database dependencies, and deployment procedures.
- Executed and supported Blue-Green deployment to minimize downtime, version updates and reduce deployment risks during application releases.
- Collaborated closely with software developers, QA engineers, infrastructure teams, and stakeholders within Agile/Scrum delivery cycles to ensure stable and timely software releases.
- Created and maintained technical documentation, deployment guides, DR checklists, and troubleshooting procedures to improve team knowledge sharing and operational consistency.
- Supported Git-based source control workflows, pull request reviews, branch management, release coordination, and deployment approvals.

Software Developer - Intern

July 2024 – Sept 2024

Creative Dynamix Solutions Inc.

Manggahan, Pasig City

- Gained hands-on experience in ERP system, Microsoft Dynamics 365 Finance & Operations development, specializing in X++ programming, form creation, report generation, and system customization.
- Developed a Fleet Management System during training to improve vehicle tracking and resource management.
- Worked on DTXCustVoucherTransDiff customization by mapping fields, adding methods, modifying columns, debugging, and ensuring accurate posting logic, while also creating custom views and optimized system functionality to enhance data accessibility and reporting.
- Implemented enhancements by integrating one-time location addresses into remittance locations for invoice journals, streamlining financial processes.

Co-curricular Activity

AWS Cloud Club – Pup Manila

Sept 2023 – Jan 2025

Junior Data Analyst Member

- Actively participated in club activities and initiatives focused on cloud computing, data analytics, and emerging technologies.

Skills Summary

Language:	Python, C#, SQL (Postgres), JavaScript, HTML, CSS, Bash/Powershell
DevOps Tools:	Azure DevOps, Git, GitHub, SonarQube, CI/CD Pipelines, OWASP Dependency Check, Linux, Kubernetes (Lens), Docker, DevSecOps, ArgoCD, Grafana
Platforms:	Visual Studio 2022, Visual Studio Code, Termius
Soft Skills:	Adaptable, Strong Time Management, Effective Communication, Team Player, Quick Learner
